

IEEE Biometrics, Identity, and Security (BIDS) Research Showcase at the Biometric Consortium Conference requests proposals for invited presentations. IEEE BIDS is an opportunity for researchers (academic, government and industry) to showcase their research to technology providers, systems integrators, government, and program managers in order to shape next-generation systems. IEEE BIDS is seeking presentations for three topic areas:

- Identity and Cyberspace
- DNA as a biometric
- Standoff, unposed biometrics

The goal is to foster exchange of biometrics, identity, and security ideas and issues across this interdisciplinary group. Interested individuals should send an email to BIDSconference@gmail.com with a brief summary of recent research accomplishments related to the topic area and a short biography. Announcements of invited speakers will be made on or around June 17, 2011.

Important Dates

Call for Proposals: April 11, 2011
Abstracts Due: June 7, 2011
Notification of Invited Speakers: June 17, 2011
Session: September 27, 2011

Format

Invited Presentations

Abstract Review

Email to: BIDSconference@gmail.com

Stephanie Schuckers, Clarkson University (Co-Chair)
Michael Schuckers, St. Lawrence University (Co-Chair)
Patrick Flynn, Notre Dame
Terry Boulton, Colorado State University
Arun Ross, West Virginia University
